Architecture

Sector

Social and affordable housing

Brief

Create a masterplan within the existing Bryndwr neighbourhood, comprising a versatile range of one- to five-bedroom homes, a mix of standard home designs, bespoke apartments, and specialist typologies.

Creating a sense of place in Christchurch

We're currently working with Kāinga Ora to develop a masterplan within the existing Bryndwr neighbourhood, which presents the unique challenge of three frontages connected through internal sites in the centre and wrapping around existing corner sites and buildings. Comprising a versatile range of one- to five-bedroom homes (a mix of the standard home designs Context crafted alongside Kāinga Ora, as well as carefully considered bespoke apartments and specialist typologies), the new community will create unique character areas that relate to the existing neighbourhoods and strengthen their overall sense of place.
